Components for your success

In September Italy-based bagging specialist Concetti celebrated its centenary (see p3); pictured during the festivities are three generations of the family dynasty – in the middle of the picture are Teodoro (centre left) and Giuseppe Concetti (centre right) owners of Concetti SpA with their sons Francesco, Emanuele (left) and Riccardo (right), together with their young families.

In early October SYMACH organised an open day at its plant at Terneuzen, the Netherlands, to demonstrate the company's latest developments in palletising and bagging technology (see p9).

AUMUND continues to enjoy a fruitful relationship with the Turkish cement industry; AUMUND Beijing has just won a huge order to supply three belt bucket elevators (of the type pictured), five chain bucket elevators, seven pan conveyors and five drag chain conveyors, type LOUISE, all to be shipped to Limak Cimento later this year (see p11).

AsiaBulkSystems – the new sister publication to EuroBulkSystems which reports bulk handling, processing and transport developments throughout Asia, the Middle East and Australasia – was launched at two important trade shows taking place during two consecutive weeks in October: POWTECH India in Mumbai and, one week later, at IPB 2018 in Shanghai; the AsiaBulkSystems booth at the Chinese event is pictured left.

German engineering company MIXACO, which invented the container mixer in 1965, has continued to develop this specialist processing technology by customising it to suit the specific needs of its customers in Europe and overseas; for further details see p13.

IN THIS ISSUE

News 3-11

Pioneering cloud platform for food and feed processing industries; Concetti centenary coincides with major factory expansion; new Vortex agent for Egypt; RKW invests further in production of plastic socks and FFS films; Eirich wins major Australian granulation order; PCL acquired by Schenck Process

Some technical advances to be unveiled at SOLIDS Dortmund 12

Container mixing: a concept that continues to evolve 13

Level and inventory measurement of bulk solids 14-15

Advanced analytics capability offered by the latest 3D solids scanners helps enhance storage site safety

New Equipment 16-18

Products vacuum dried and coated with a single machine; control valve extends shelf life of food and beverages; twin flexible screw conveyor has common hopper; fast filling of lined freight containers; high-capacity air classifier mill; transmitter makes any strain gauge wireless; rotary valve now handles fragile food materials

PEGASUS® MIXER

Powders, granules, extruded products, micro-ingredients, liquids and even fresh vegetables: we mix them all with exactly the same result. We do so quickly but carefully in order to prevent damage and save time and costs. And if you wish, it can be done with automatic dosage systems and in a completely controlled and automated fashion (gravimetric or volumetric).

Visit us at Solids Dortmund from 7 to 8 November (Stand Nr. C18-4) www.dinnissen.nl
